

Tailored Collection Installation Details

Thank you for purchasing your Aquavision Tailored Collection.

Installation is very simple and we recommend it happens as follows

1. Make sure that you have cut a hole in the wall to the correct size and have got 2 wooden uprights, one either side, to fix into. You can fix straight into masonry but wood is the preferred option for ease of fixing

Model	Width between Fixings - mm	Width between Fixings - inches
AVG32L-16PMVPL AVG32L-16PMVPLA	389	15 ½
AVG32L-16LMVPL AVG32L-16LMVPLA	600	23 ¾
AVG32L-22LMVPL AVG32L-22LMVPLA	545	21 ½
AVG42L-16PMVPL AVG42L-16PMVPLA	389	15 ½
AVG42L-22PMVPL AVG42L-22PMVPLA	545	21 ½
AVG42L-16LMVPL AVG42L-16LMVPLA	600	23 ¾
AVG42L-22LMVPL AVG42L-22LMVPLA	937	37

2. Insert the correct number of fixings for each model into the uprights at the correct spacing, leaving approx. 12mm or ½" of screw protruding to clip the tailored collection chassis onto

3. Attach the LCD to the back of the Tailored collection chassis with the white plastic thumb nuts provided
4. Connect all cables and test.
5. Offer the tailored collection assembly onto the wall and it will locate onto the screws and drop around 5mm or ¼" to its resting place
6. If this is to be used in a wet area, you will need to apply a bead of silicone around the side, between the glass and the wall to prevent water ingress
