

# Using the Aquavision relay to switch speaker sources

To use a single speaker for your Aquavision and a second sound source such as Aquavision Echo, Sonos etc, we suggest you use our AVF-5RLYF4P, 4 pole relay switch unit. These are independent units for each Left and Right speakers. Shown below is how to set up one unit. Simply link the second unit on as shown for the second speaker.

When you turn the Aquavision on, the sound will automatically switch from the current (Echo, Sonos etc.) source, to the Aquavision Television
