

The Residential Collection

Model: 22" Polar White Frameless

# In 1997 Aquavision® pioneered in-wall and waterproof televisions

Television should be an intrinsic part of the overall design of any living space and enjoyed in any room regardless of environmental challenges.

A balance of elegance and substance make up part of our recipe for producing world class, hand built, high performance televisions for all applications.

Over the past 2 decades as our portfolio has broadened, our global footprint and client base has expanded. During this time Aquavision has continuously succeeded to innovate and manufacture exquisitely designed televisions for all environments.

Our belief is that luxury is timeless, not throwaway, which is why we support all products as far back as 15 years.

Today, the Aquavision brand is well established and successful. This fuels our passion to continue to produce high quality, luxury televisions.

We never compromise on quality and this is why we remain the number one manufacturer of in-wall and waterproof televisions.

Model: 32" Polar White Classic

# It is reassuring to own the genuine article...

Such is the case with an in-wall television by Aquavision<sup>®</sup>, where the originator's guarantee ensures peace of mind.

Since creating the world's first waterproof television in 1997, Aquavision's innovation team have remained market leaders in the sector of in-wall televisions and developed a network of professional partners worldwide.

Often copied but never equalled, purchasing an Aquavision means acquiring the core values at the heart of this very British success story: Ingenuity, Quality and Reliability.

Suitable for a variety of residential applications, Aquavision offers customers an unrivalled choice of sizes, styles and finishes coupled with an emphasis on innovative, future proof technologies.

Specialist advice, installation expertise and ongoing support are merely a telephone call away thanks to an in-house technical team based at the company's UK headquarters.

With this in mind, it is hardly surprising that Aquavision have unwittingly gained the reputation of being "the preferred choice of the professional".

# An Aquavision® to complement every room

With screen sizes from 16" to 65" and a choice of glass colours, there is an Aquavision® to blend into every room setting. No cables, no visible connections, just a television to enhance your room design.

Once only associated with water-contact zones such as the bathroom and kitchen, Aquavision's streamlined styling and invisible technologies are now increasingly prevalent throughout the home. An unrivalled choice of screen sizes, glass finishes and frame types gives the brand

a timeless quality. Making Aquavision the number one choice for 'wet' or 'dry' zones, contemporary or classical settings, new-build or renovation. Making the home a sanctuary seems to be the modern-day maxim and the increased number of clients investing in spa

zones and cinema rooms are testimony to this. The 4K Ultra High Definition format offers unparalleled viewing angles and immersive picture depth 4 times that of regular High Definition.

Model: 32" Black Classic

# Stay connected in the Bathroom

Aquavision® gives you a safe, stylish escape in the haven of your bathroom. The fully waterproof televisions have the best viewing angles in the industry, ensuring perfect visibility from anywhere in the room.

The invention of the first Aquavision featuring waterproof speakers, a waterproof remote control and, of course, a waterproof screen coincided with a shift in mentality towards ‘the

bathroom’. No longer was it simply a place for washing and bathing; moreover a space to relax, recharge the batteries and embrace some precious ‘me-time’. Whether catching up

on downloads, listening to favourite tracks or keeping up with current affairs, an Aquavision will transform your bathroom from a functional space to your own personal sanctuary.

Model: 22" Polar White Frameless

# Stay connected in the Kitchen

Aquavision® televisions offer full High Definition screens with the widest viewing angles available, ensuring a crystal clear image that can be seen from anywhere in the room.

After tremendous success in the Bathroom sector came a demand for Aquavision screens within a kitchen and dining environment. A trend towards open-plan living favoured the integration of audio-visual technologies into cooking and

dining zones. Aquavision TV's are wipe clean and safe to be installed almost anywhere, even behind the hob. Current models feature Digital Freeview HD, USB inputs and HDMI connections, as well as having optional Android Smart TV

and touch screen options. Every element of today's modern kitchen has been cleverly designed to combine luxury with functionality. Your Aquavision should be an intrinsic part of the overall design, rather than an add-on.

# Bespoke MirrorVision+®

Aquavision is at the forefront of the specialist audio visual sector. An increasing number of unique products and an unrivalled know-how make Aquavision the preferred choice of the design professional.

Specialists in the design of audio visual systems, Aquavision offers a unique bespoke service, incorporating any size and model of Aquavision screen (from 12" to 65") concealed within glass sections of up to 2.4m x 1.5m, providing endless

design solutions. Incorporating MirrorVision+ technology, the screen can be hidden within what appears to be a perfect mirror with no visible signs of a screen when the tv is switched off, yet allowing the television image to be clearly seen

when the tv is switched on. MirrorVision+ models are perfect for bedrooms, living rooms, studies, bathrooms or anywhere there is a requirement for a discreet, seamless television installation.

# Stay connected Outdoors

Aquavision's new Horizon Outdoor TV has been exquisitely designed and is guaranteed to enhance your swimming pool, patio, garden, yacht or any other outdoor space.

Following on from Aquavision's huge success indoors, the Horizon range of fully waterproof televisions allow you to extend your living space outdoors. Including in-wall, on-wall and free-standing options, and with a variety of sizes between 32" and 100", there is a Horizon for every application.

The Horizon incorporates world-leading technology including our own Comprehensive Thermal Management (CTM) and Advanced Daylight Sensing Technology (ADST), allowing the Horizon models to constantly monitor humidity & temperature, and independently monitor & adjust screen brightness to the

optimum range for its current environment. Providing complete protection against the elements, and able to withstand temperatures between -40°C (-40°F) and 110°C (230°F). So whether you favour sun or snow, Horizon is fully equipped to take on any integration challenge.
