

# MirrorVision+ Glass Detail

Producing a television product which gives a true mirror finish when the television is switched off, requires a specialist glass frontage. Many have tried, but we have succeeded! MirrorVision+ glass from Aquavision® achieves a perfect balance between the conventional, 100% reflective “silver” mirror and the minimally reflective glass normally required for television viewing.

The end result is MirrorVision+, a perfect mirror, and a perfect picture.

Perfect for every room in the house, hotel, office, everywhere that you would put a mirror or a television, you can now put both! With absolutely no visible signs of the television when it is turned OFF, Aquavision has come up with the perfect solution.

MirrorVision+ - High Brightness Mirror Glass	
Glass Thickness	6mm
Glass Weight	12.5kg/m <sup>2</sup>
Glass Substrate	Crystal Blue on Clear
Production Standards	ISO 9001; Lead Free; ROHS
Performance: Light test with spectrophotometer	
Light/Energy Transmission	23.78%
External Light Reflection (coating side)	50%
Internal Light Reflection (glass side)	26.91%
Visible Colour Reflection	100%
Visible Colour Transmission	99.90%
100% Colour Match to a Natural Mirror	
94% Brightness to a Natural Mirror	
Distortion-free Mirror Reflection	

*Unlike competitor products, MirrorVision+ even works in high ambient light environments!*

Aquavision have sourced this glass from a company with many years experience in vacuum coating, they are the world's originators in using high-tech magnetron sputtering in the production of vacuum mirrors. Using this system we have innovated a proprietary hard-coating technique, which, when applied to the final stages of glass formation, produces a surface that is 5 times harder to scratch and which substantially increases the products shelf life. The propriety coating is strengthened using Stainless Steel and Titanium.
