

Remote Switch Panel

The Aquavision remote switch panel is exactly what it says, a small switch panel that gives you instant control of your Aquavision television without having to find the remote control. Ideal for hotels and guest houses, or indeed anyone who does not want remotes 'lying around'. Installed into a simple '1 Gang' back box, the same size as a normal light switch, this unit provides the user with simple, discreet, and permanent operation of the most basic functions that you need.

Simply plug the supplied lead into the base of the Aquavision, and the other end into the switch panel and you are ready to go!

The remote switch panel is supplied with the following:

- 1 Gang back box [72 x 72 x 35mm]
- 5m interconnecting lead
- Switch panel [95mm x 85mm x 6mm]
- Facia Membrane (replacement membranes are available to purchase separately)

These are all the necessary parts that you will need to use.
