Export Sysconfig				
Import Sysconfig				
Import New Logo				
Export Satellite DB	OK			
Import Satellite DB				

STEP 4 - Exporting Satellite DB

Export Satellite DB using Right soft-keys, Then the "OK" Item value will display. It shows that the DB export is now complete

STEP 5 - Check the DB List

Remove the memory stick from your Aquavision and insert it into your PC. You will see a folder named "CV_9202" Under this folder you will see a file "CV_DBS.bin". This shows that the prelist is now exported OK. Edit as required.

STEP 6 - Importing Satellite DB

Push the USB device (With the CV_9202 folder) into your Nexus motherboard USB input. Choose the Satellite TV connection mode like Step 1.

Repeat steps 2 and 3 in the factory menu. Choose the Import Satellite DB item using Right soft-key. Then the TV will restart with the programs displaying in the chosen order.
