

Aquavision are proud to announce their new range of outdoor televisions: Horizon.

Exquisitely designed, this new range is guaranteed to enhance your swimming pool, patio, garden, boat, and any other outdoor area: whether you are in the residential, commercial, or hospitality sector. Keeping you, your guests, and your clients completely entertained.

Based on the Nexus+ or Pinnacle Smart range, and packed with features such as **IP control**, **DVB-T2/S2 receivers**, **2 HDMI** and **USB** inputs, this Fully IP65 rated television provides the ultimate protection against water, dust, sand, moisture and insects.

Offering brightness levels of 350-2500cd/m², your Aquavision outdoor television provides a high quality, high-brightness*, LED Television. Supplied as standard with a wide range of inputs and with an RS232, IP and discrete IR control as standard, this product is fully compatible with all leading control systems.

All “High Brightness” and “Ultra High Brightness” screens come with the following features.

- Comprehensive thermal management where the humidity and temperature are constantly monitored and adjusted where necessary.
- These screens also incorporate heaters enabling them to be stored and to operate in extremely cold environments without any problems.
- They also incorporate advanced daylight sensing technology where the brightness of the screen is constantly monitored and adjusted according to ambient light level to enhance your viewing experience and prolong the life of your Aquavision.
- Antireflective/antiglare glass for enhanced viewing
- Accessory slot for Baluns, DM receivers, HDBaseT receiver’s etc. enabling total integration with proprietary band operating systems whilst still retaining waterproof qualities.
