

Speaker Installation Guide

Caution – Please read the following information before using these speakers:

- To ensure the finest performance, please read this information carefully and keep it in a safe place for future reference.
- Install the speakers in a cool, clean place away from windows, heat sources, sources of excessive vibration, dust and cold. Avoid sources of humming (transformers, motors, etc.).
- To prevent potential electric shock, do not expose the speakers to drips or splashes.
- Do not place the speakers where foreign objects might fall. It might cause damage to this unit and/or personal injury.
- Clean only with a dry cloth.
- AQUAVISION® recommends that all AQUAVISION® speakers are installed by authorised and trained technicians.
- AQUAVISION® shall not be liable for any accident caused by improper placement or installation of speakers.
- If at any time you notice distortion, reduce the power of your amplifier immediately. Ensure that the input power does not exceed the specified maximum input power; this will cause damage to the speakers.
- Do not attempt to modify or fix the speakers. Contact qualified AQUAVISION® service personnel if any service is required.
- No user-serviceable parts inside. Refer all servicing to qualified service personnel.
- Warning: To prevent injury, this apparatus must be securely attached to the ceiling in accordance with the installation instructions. No naked flame sources such as candles should be placed near the product.
- Caution: Changes or modifications not expressly approved by the manufacturer could void the user's warranty.
- Drywall or other mounting surfaces should be at least 9mm thick to ensure safety and speaker stability.
- Speaker placement should be planned to accommodate practical considerations such as wiring path and installation surfaces.

Ceiling Speaker Supplied Accessories:

- Mounting Screws - All relevant screws are included.
- Grills x 2 - Grills for each speaker are provided.
- Cables x 2 – 4m OFC high quality speaker cable.

Surface Speaker Supplied Accessories:

- Mounting Screws - All relevant screws are included.
- Brackets x 2 – wall mount brackets for each speaker are provided.
- Cables x 2 – 4m OFC high quality speaker cable.

Speaker Placement Installation Guide:

- Realising maximum sound performance is always the goal. Placing speakers at equal distance from the intended listening area and along a common wall/ceiling is generally recommended as the ideal acoustic arrangement. This helps to ensure the best stereo effect.
- Where the intended listening position may vary, AQUAVISION® speakers are designed to function in any standard wall or ceiling. In a standard two channel audio system, the speakers should be approximately 185 – 305cm apart. If possible, the left and right speakers should be located the same distance from the primary listening position.

Ceiling Speaker Installation:

- Carefully mark out, then check for obstacles before cutting. When you are confident, cut the hole for the speaker.
- Once the hole is cut, clean all edges and debris from the area. Attach the wire from your AQUAVISION to the terminals on the back of the speaker.
- Insert the frame into the ceiling opening and attach to the mounting surface by tightening the screws to engage the swinging “dog” ear connectors. The frame's mounting dog ears will “sandwich” the ceiling and frame together.
- Install the speaker and press the grill in place. Start the insertion of the grill on one edge and slowly work your fingers around the grill edges. Make sure all edges are in the groove before you apply pressure. Do not push hard. If the grill is not going in all edges are not in the groove properly. Ease off the grill and start again.
