Specified in luxury hotels worldwide since 1997

Aquavision are the originators of bathroom and in wall televisions, designing and manufacturing in the UK since 1997.

We believe luxury is timeless, not throwaway. Our purpose is to create innovative, high performance televisions, capable of integration with any matrix or IPTV system, revolutionising boutique televisions for luxury hotels.

For two decades we have been passionately committed to engineering eye-catchingly elegant, waterproof, in wall and mirror televisions in the UK, once regarded as "inconceivable" to many. We feel proud to be part of enhancing the guests' experience and, look forward to consolidating Aquavision's reputation as a 'remarkable' brand.

House Manager Csaba Balogh – Le Manoir

Belmond Le Manoir aux Quat'Saisons strives for perfection and continues to try and exceed our guests expectations in cuisine, comfort and hospitality. It has held the industries top awards for over 30 years, including 2 Michelin star for a remarkable 32 years. Attention to detail is paramount and that applies to the technology we incorporate into our guest bedroom and suites. Aquavision is our first choice for bathroom televisions. They are a British success story in their own right and have enhanced our guests' stay for years.

Architect for Exclusive Hotels – Monia Allegretti , Archinterio

Designing spaces within Exclusive hotel rooms is an exciting challenge for me. My designs are more about engaging the hotel guest, about connecting with their emotions – a customer is for life! Aquavision TVs heighten the guest experience and help create that harmonious balance between a relaxing haven and an extended space where the guest can remain connected and entertained with elegant technology. To me, that can only be a great thing!
