

The Professional Collection

Model: 22" Polar White Frameless

In 1997 Aquavision® pioneered in-wall and waterproof televisions

Television should be an intrinsic part of the overall design of any living space and enjoyed in any room regardless of environmental challenges.

A balance of elegance and substance make up part of our recipe for producing world class, hand built, high performance televisions for all applications.

The Evolution of Television

Television has evolved since its inception in the 1940's. First black and white, then colour in the late 50's. It's come a long way since the three-inch screens changed, for a while it seemed the 25" would be the standard. In the early 90's CRT or conventional "tube" televisions actually grew up to 40".

In 1997 the first flat screen television was introduced. Though it was the same picture size, it was less than two thirds the weight of the conventional tube television. From that point on as the flat screen gained

popularity the resolutions got better, the sizes bigger and the demand for slimmer televisions increased. Why is that? Cultural anthropology reveals our inert nature to continue to improve the designs of our living spaces and enhance lifestyles.

At Aquavision we have always believed televisions should be built in the wall to blend into the home décor. We introduced the first in-wall television in 1997 and, since it remains the most pervasive technology in the home, we believe it deserves its pride of place.

Despite changing viewing habits due to the technological media revolution, television viewing is on the rise!

Knowing television is 'hard-wired' into 21st century culture, this spurred us on to pioneer a number of "world's first" products. We are proud innovators of waterproof televisions and remain the only company to manufacture an expansive range of high performance in wall televisions from 16" - 65".

It is reassuring to own the genuine article...

Such is the case with an in-wall television by Aquavision[®], where the originator's guarantee ensures peace-of-mind.

Since creating the world's first waterproof television in 1997, Aquavision's innovation team have remained market leaders in the sector of in-wall televisions and developed a network of professional partners worldwide.

Often copied but never equalled, purchasing an Aquavision means acquiring the core values at the heart of this very British success story: Ingenuity, Quality and Reliability.

Suitable both for residential and commercial applications, Aquavision offers customers an unrivalled choice of sizes, styles and finishes coupled with an emphasis on innovative, future proof technologies.

Specialist advice, installation expertise and ongoing support are merely a telephone call away thanks to an in-house technical team based at the company's HQ.

With this in mind, it is hardly surprising that Aquavision have unwittingly gained the reputation of being "the preferred choice of the professional".

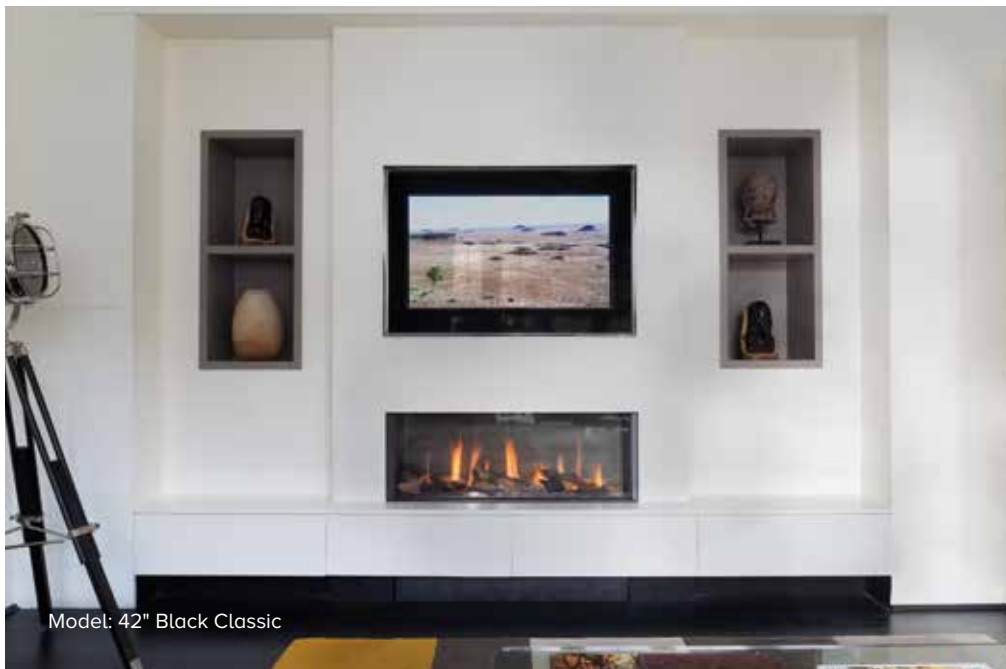

An Aquavision® to complement every room

With screen sizes from 16" to 65" and a choice of glass colors, there is an Aquavision® to blend into every room setting. No cables, no visible connections, just a television to enhance your room design.

Once only associated with water-contact zones such as the bathroom and kitchen, Aquavision's streamlined styling and invisible technologies are now increasingly prevalent throughout the home. An unrivalled choice of screen sizes, glass finishes and frame types

(Classic, Silhouette and Frameless) gives the brand a timeless quality. Making Aquavision the number one choice for 'wet' or 'dry' zones, contemporary or classical settings, new-build or renovation. Making the home a sanctuary seems to be the modern-day maxim and the

increased number of clients investing in spa zones and cinema rooms are testimony to this. The 4K Elite Ultra High Definition format offers unparalleled viewing angles and immersive picture depth 4 times that of regular High Definition.

Model: 32" Black Classic

Stay connected in the Bathroom

Aquavision® gives you a safe, stylish escape in the haven of your bathroom. The fully waterproof televisions have the best viewing angles in the industry, ensuring perfect visibility from anywhere in the room.

The invention of the first Aquavision featuring waterproof speakers, a waterproof remote control and, of course, a waterproof screen coincided with a shift in mentality towards 'the

bathroom'. No longer was it simply a place for washing and bathing moreover a space to relax, recharge the batteries and embrace some precious 'me-time'. Whether catching up

on downloads, listening to favourite tracks or keeping up with current affairs, an Aquavision will transform your bathroom from a functional space to your own personal sanctuary.

Models: 27" Polar White Classic and 16" Essential MirrorVision

Stay connected in the Kitchen

Aquavision® televisions offer full High Definition screens with the widest viewing angles available, ensuring a crystal clear image that can be seen from anywhere in the room.

After initial success in the Bathroom sector came a demand for Aquavision screens within a kitchen and dining environment. A trend towards open-plan living favoured the integration of audio-visual technologies into cooking and dining zones. Aquavision

televisions are wipe clean and safe to be installed behind the hob. As well as being compatible with all major home automation systems, current models feature USB inputs, HDMI connections and are compatible with all cable systems. Every element of today's

modern kitchen has been cleverly designed to combine luxury with functionality. An Aquavision should be an intrinsic part of the overall design, not an afterthought.

Model: 22" Bespoke

Aquavision® the professional choice

For private residences, on board luxury yachts and jets, at spa resorts and sports centres, within boardrooms and hotels.

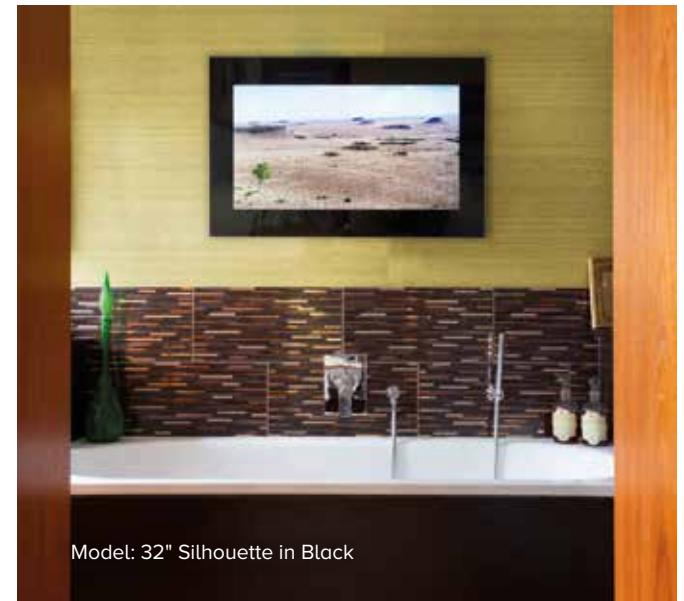

Hotels and Commercial

Aquavision's focus on evolving technologies makes them the number one choice for hotel, corporate and commercial applications. In addition to offering the technical expertise necessary to ensure compatibility with the existing hotel/venue entertainment system, Aquavision can personalise models to reflect individual tastes in terms of décor, style and layout. All Aquavision items are purposely designed to be upgradeable on-site so that future upgrades or changeovers can be easily achieved without any major restructuring or disruption.

Compatible with all leading Control Systems

Model: 32" Silhouette in Black

Aquavision®

Proudly designed and manufactured in Britain.

Aquavision is a proud member of the Made in Britain campaign, a marque created by UK manufacturers to support and promote British Manufacturing in the United Kingdom and overseas. As prolific inventors and innovators, the company is considered a prime example of the wealth of know-how, specialist expertise and technical acumen that exists in the UK and for which the Made in Britain association was founded to showcase and celebrate.

All Aquavision products are covered by a 2 Year Parts and Labour Warranty.

CEDIA MEMBER 

Selecting the most suitable Aquavision®

Selecting the correct Aquavision® model to suit each application is made simple by a few easy to follow combinations. The majority of requirements are met by the Aquavision Essentials collection, just select the screen size and everything is included.

Aquavision Essentials

The first choice for stand alone television requirements, suitable for the majority of applications and understandably the best seller in the range. The popular Genesis offers:

- MirrorVision frameless glass
- Unique 178° viewing angle
- Anti-mist heated screen
- Compatible with all cable systems
- 2 x HDMI Inputs
- Built in amplifier
- 2 x AVF-4 Speakers
- Master Remote Control
- Waterproof Remote Control

What's in the Box?

Screen Sizes Available:

16"

22"

27"

32"

42"

Aquavision® Extended Range

For a more versatile or personalised system, clients are able to build their own combinations using our Extended Range.

Features

As well as the Genesis platform that is available in the Essential range, Aquavision also offer the following:

Nexus

Nexus offers all the features as the Genesis plus IP and RS232 making it a favourite of the Integrator. Fully compatible with all leading control systems.

ConneCTV Active

Aquavision developed the world's first HDBaseT built inside television. Full HD 1080p signal, bi-directional control, power and signal over a single CAT5E or 6 cable up to a distance of 70m. This range is only available in 22"

Elite 4K

The world's first waterproof 4K television pioneered by Aquavision. This range is available in 55" and 65" screens and offers a truly immersive viewing experience with 4K Ultra High Definition.

- DVBT-T2/DVB-C
- 3 HDMI Inputs available

Frame Styles

Frameless

This simple, unobtrusive glass screen design will merge into any room décor and wall finish. Frameless is currently the most popular screen design from which the Essential collection is built.

Classic

The original, iconic Aquavision® design. With a high quality, polished stainless steel bezel that gives a statement of pure luxury whilst framing the glass front. This option provides a fully flush in-wall appearance. For sizes up to 42" only

Silhouette

Sleek lines combined with an ultra-thin profile (cleverly hiding the mounting frame) that neatly conceals any cabling, all brought together to produce an impressive 'suspended-in-air' on-wall alternative.

Glass Finishes

Black

Using Optically Clear glass for exceptional clarity & picture quality.

Polar White.

Using Optically Clear glass for exceptional clarity & picture quality.

MirrorVision®

Turned off, the glass has a slightly tinted mirror finish. Turned on, the mirror gives way to the television screen.

MirrorVision+®

A perfect mirror with no visible signs of a screen when the television is off but allows the television image to be clearly seen when switched on.
