Aquavision launch Kitchen Range

Aquavision the originators of in-wall and waterproof televisions, are launching their first in-built Kitchen range, featuring varied sizes of television from 16” to 42”.

The range is designed to fit ergonomically into a multitude of kitchen cupboard sizes. The range includes electrically operated kitchen doors, incorporating the latest in television technology. As with all Aquavision televisions, these models will be IP66 rated with heated screens to prevent misting up.

All models are available in Genesis, Nexus, Nexus+ and Pinnacle Smart TV models, with features such as Discrete IR, RS232 and Full IP Control.

“We are pleased to be branching out into this new sector” comments Alastair Benn, Managing Director of Aquavision. “We think that this range will prove to be a huge hit, especially in the CI market thanks to our compatibility with the world’s leading integration systems, including Control4, Crestron, AMX, Savant and RTI to name but a few.”

ABOUT AQUAVISION

Since creating the world's first waterproof television in 1997, Aquavision's innovation team have remained industry leaders in the sector of in-wall and waterproof televisions and developed a network of professional partners worldwide. Aquavision are proud to be the first television manufacturer member of the Made in Britain campaign, a marque created by UK manufacturers to support and promote British manufacturing in the United Kingdom and overseas. As prolific inventors and innovators, the company is considered a prime example of the wealth of know-how, specialist expertise and technical acumen that exists in the UK and for which the Made in Britain association was founded to showcase and celebrate. The pioneers of in-wall and waterproof televisions, Aquavision's products are sold throughout the world, and have representation across six continents in 31 countries.

- 1997 Aquavision invents the world's first ever in-wall and waterproof television
