

Why choose an Aquavision?

There are many makes of waterproof, bathroom and in-wall televisions on the market today, all claiming to offer a varied array of sizes, finishes, styles and features at widely varying price points.

So, what makes Aquavision a unique brand?

- Aquavision are the Originators of the waterproof, bathroom and in-wall television, designing and building high performance televisions for harsh environments since 1997, well before any other brand came into being.
- All our products are designed and manufactured in our own premises in the UK.
- Aquavision's products are verified by the "Made in GB Campaign", a trade body that is endorsed by the government.
- Our televisions are designed from the ground up to be enclosed in walls. They are engineered to eliminate thermal issues and cleverly crafted to lengthen the product life cycle.
- We are not a "box shifter", an "importer" or a "reseller" We are a specialist factory that designs and builds our own specialist product.
- We don't import or rebrand other people's products and we are not a franchise operation.
- We offer the widest range of sizes, styles and features of any waterproof, bathroom or in-wall television manufacturer.
- We guarantee to support all our products and offer upgrade solutions up to 15 years! We boast a "Fit and forget" mantra, assuring complete peace of mind.
- Our LCD's provide full 178° x 178° viewing angles to give you the best viewing experience.
- All our panels are commercial grade panels, so they are guaranteed to last up to 10 times longer than conventional television and laptop/computer panels
- In the UK, we offer a unique 2-year in-home warranty. The only guarantee of its kind in the industry.
- Our worldwide distributors work to ensure that we offer industry leading guarantees in all other countries
- We carry stocks of all parts for at least 5 years after the television has ceased production.
- As we have our own factory, we are in 100% control of the product you order and therefore the product we deliver.
- Aquavision do not sell direct to the consumer, ensuring the brand is sold correctly with the correct support.
- Aquavision are compatible with the world's leading home integration control systems as well and were the first specialist television to incorporate RS232 control
- Where internet or IP is specified, we never use WIFI or add on "dongles" to receive or process the signal. Due to signal strength and the fact that you are building a television into a wall, we feel WIFI is not a good enough option so will only use "cabled" signal.
- We are compatible with and have worked with most of the leading hotel TV brands
- We are already the number one choice in many of the world's most popular hotels, countless independent boutique hotels and the majority of the world's best Home Network and Custom Installation integrators.

With all the above taken into account, why would you want to look elsewhere?
